

Paper Folding Boats.

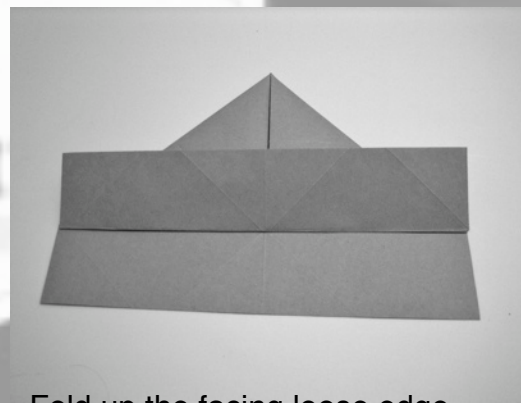

Start

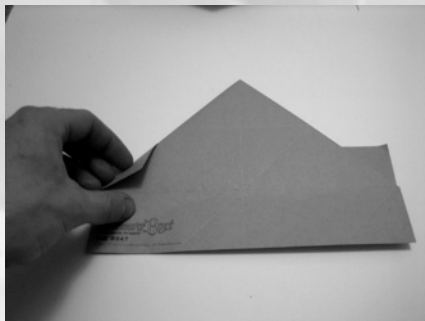

Fold the paper down into half.

With the fold at the top, fold the top corners to meet in the centre crease.

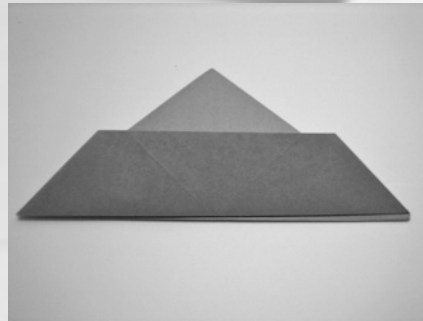

Fold up the facing loose edge from the base of the triangle folds.

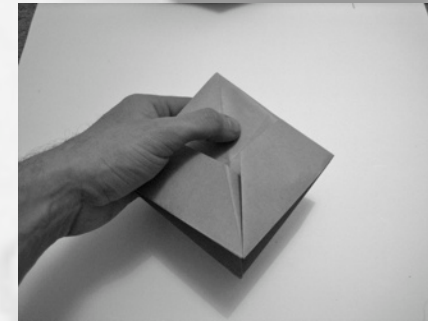

Turn over the paper. Fold in the small triangles in the left and right of the paper.

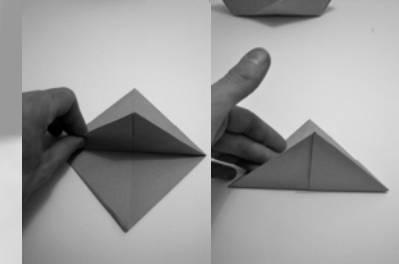

Then fold up the opposite corners below to meet the folded small triangles above them

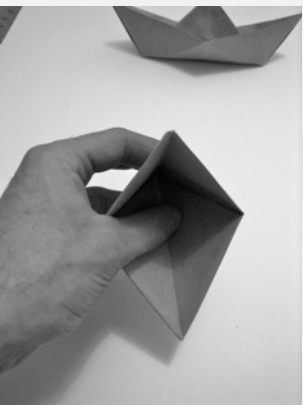

Fold in the base edge, so that the fold line is where the 2 small triangles meet at each side.

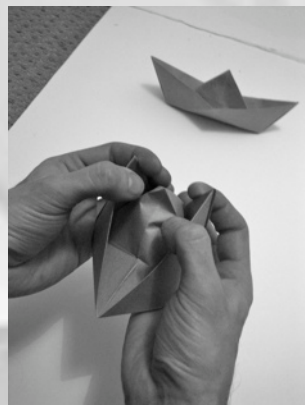

Lift up the folded paper and open out the base so it looks like a hat, then push opposite sides down and fold into a diamond,

Fold up the base to the top, turn over and do the same again to make a triangle.

Again, lift up the folded paper and open out the base so it looks like a hat, then push the opposite sides down and fold into a

Stand up the diamond tall and open out the top corners and slightly push from underneath and softly flatten the sides form your own paper boat!

Paper folding uses a multitude of skills. Follow the instructions below and make a paper boat. Take it home and draw, paint, embellish the surface to create a personal response.
